SPANISH

¡HOLA!

Spanish is not one country's language. It is spoken on both sides of the Atlantic, in the mountains, by the sea, in enormous cities and in tiny villages, and it sounds a little different in every one of them.

This resource takes you round the Spanish-speaking world: the countries and their capitals, the landscapes, the food, the music, and the words that change as you travel. More than 80 words and expressions, each one in a real sentence.

You don't need to know any of it already. Read a little at a time, say the names out loud, and look for the countries on a map as you go. At the end there are activities to check what you remember, and all the answers.

How to use it

1. **Find each country on a map.** Words stick far better when they have a place.
2. **Say the names out loud.** Nicaragua, Paraguay, Honduras: they're fun to say.
3. **Notice the differences.** The same thing can have three names in three countries.
4. **Try the activities** without looking back, then check the answers.

One language, many voices

Spanish is the official language of twenty countries, plus Puerto Rico. Nobody speaks "neutral" Spanish: everyone has an accent, and all of them are correct.

el autobús 🇪🇸 = **el colectivo** 🇦🇷

¿Español o castellano?

Both words mean the same language. In Spain and in much of South America people often say **castellano**; in Mexico, Central America and in English we usually say **español**. Use whichever you like.

el español = **el castellano**
